

Safe-T-View Cover™

Egress window Well Cover

- Hybrid galvanized frame with UV protected clear XL polycarbonate materials. You can see the strength. Powder coated option available on special order.
- Engineered as fully self-supporting requiring no bracket mounting into the home's siding.
- Innovative squeeze-and-size spring clip fastening installs on new and retrofit applications accommodating areawalls distorted from original factory dimensions. No special sizing required.
- Industries only safety retainer-hinge lanyard system allowing up-and-forward pivot for access. Prevents cover from falling in on expensive egress windows or on occupants attempting to exit.
- Designed to install over any manufactures' areawall regardless of profile.
- Unique vented design eliminates the greenhouse effect common in non-vented products.
- Sloped for drainage. Unlike flat covers, water will not accumulate in the window well.
- No assembly required. Tool free installation*.
- Designed to be compatible with egress ladders required by modern residential building codes.
- Designed with the DIY homeowner in mind. Protect and enhance your basement windows.
- Tested to 500 lbs, rated for 350 lbs. static load.
- Meets all specifications as provided by the IRC2003 egress code.
- Limited lifetime warrantee.
- Patents pending
